# AUDITING & CONSULTING

Since 2010, IXO Aviation has been actively supporting air organizations in pursuit of operational excellence in the application of regulatory standards.

Airports, airlines and ground service providers can benefit from IXO Aviation's experienced team of auditors in preparing for the implementation of technical or operational requirements. At IXO-Aviation, we have developed highly effective methods, resulting in fast and qualitative processes that will guarantee your success when audited.

# SERVICES OVERVIEW

IXO Aviation auditing team has undertaken several projects for various airlines, airports, oil suppliers and ground services providers. Air organizations can benefit from our experience when preparing for audits in the following areas: aircraft acquisition, maintenance audits, AOC, safety management, IOSA and EASA audits. Specific aviation audits or aviation consultancy requests of information are welcome.

A white private jet is parked on a runway, facing the viewer. The sky is a vibrant blue with scattered white clouds. The jet has two engines mounted on the wings and a T-tail. The runway is a light greenish-grey color. The overall scene is bright and clear.

# Aruba aircraft registration

# easy & cost effective way registering your aircraft

in exclusive  
partnership with

The Registry of Aruba

The European representative
